Reviewer’s report

Title: Is population screening for abdominal aortic aneurysm cost-effective?

Version: 2 Date: 21 April 2008

Reviewer: David Bergqvist

Reviewer’s report:

This review seems to have covered the knowledge of today on health economic implications of AAA screening programs. My only small remark is that there are two Table 1 - the first Table 1 should in fact be Table 2. Some linguistic revision seems necessary.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
