Reviewer's report

Title: Blood pressure and body mass index in an ethnically diverse sample of adolescents in Paramaribo, Suriname

Version: 2 Date: 28 April 2009

Reviewer: Kotsedi Daniel Monyeki

Reviewer's report:

The authors have successfully addressed the comments raised earlier on in the manuscript. Minor corrections could be done on the caption of figure 4a and b as they showed prevalence situation and not mean distribution of blood pressure. One wonders what the distribution of prevalence of high systolic and diastolic blood pressure could be separately in this ethnic groups.
