Reviewer's report

Title: Increased Mortality among Survivors of Myocardial Infarction with Kidney Dysfunction: the Contribution of Gaps in the use of Guideline-Based Therapies

Version: 2 Date: 28 November 2008

Reviewer: Francois Schiele

Reviewer's report:

The revised version of this manuscript seems suitable for publication in my opinion.

The answers and the revision are adequate, I just suggest to correct the references: one problem occurred when the bibliography has been formatted since many references are cites twice or even three times.
