Reviewer’s report

Title: Increased vascular endothelin type B and angiotensin type 1 receptors in patients with ischemic heart disease

Version: 4 Date: 24 April 2009

Reviewer: Majid Sheykhzade

Reviewer’s report:

The authors have complied fully with the comments and questions raised. The manuscript has been significantly improved because of the inclusion of functional experiments and improvement the discussion section. Furthermore, there is a good correlation between the molecular (immunohistichemistry and PCR) and functional studies.

I have no further comments.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
