Reviewer's report

**Title:** Role of an Anesthesiology Curriculum in Improving Bag-mask Ventilation and Intubation Success Rates of Emergency Medicine Residents: A Prospective Descriptive Study

**Version:** 6  **Date:** 1 March 2011

**Reviewer:** Henry Wang

**Reviewer's report:**

I continue to have reservations about your work. You have not adequately addressed the concerns raised in my prior comments. The writing structure and mechanics still have major faults, interfering with the underlying intended meaning. The findings are not novel.

**Level of interest:** An article of limited interest

**Quality of written English:** Not suitable for publication unless extensively edited

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
