Reviewer’s report

Title: Cut throat injuries at a University teaching hospital in northwestern Tanzania: A review of 98 cases

Version: 2 Date: 12 November 2013

Reviewer: Neville Shine

Reviewer’s report:

Whilst the authors AGREE that the introduction is overly worded hey refuse to alter it. This should be unacceptable. If they do not wish to transfer the discussion to the discussion section then the paper would be better served by removing unnecessary discussion from the introduction and the entire paper.

Otherwise this is a much improved and significant paper and if the introduction is appropriately abbreviated I would be happy to accept for publication.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
