Reviewer's report

Title: National targets, process transformation and local consequences in an NHS Emergency Department (ED): a qualitative study

Version: 4  Date: 16 May 2014

Reviewer: Hans Thulesius

Reviewer's report:

This ms is improved and I only have
Minor essential revisions:

1. 4hr should be 4 hour - just to make it exactly clear to the reader that it is the 4 hour wait limit this study is about

2. Please be consistent when using past tense discussing your results in the Discussion - now it is a little bit of present and past.
   We only know of what you did and do not know what is going in right now at the ED.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
