Reviewer’s report

Title: Predictors for Delayed Encephalopathy following Acute Carbon Monoxide Poisoning

Version: 2 Date: 23 June 2013

Reviewer: sang-cheon choi

Reviewer’s report:

Thank for being reviewer of your article.

I think that your article seems to provide limited or well-known information to potential reader. Although effectiveness of HBO therapy is disputable, your findings and results that written in this article are relatively well-known in CO related field.

(ex. longer exposure --> more severe damage to all organ --> higher level of lab. tests; CK/LDH/CK-MB --> longer stay in hospital )

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
