Reviewer’s report

Title: Simple technique for the evacuation of traumatic subcutaneous haematomas under tension.

Version: 1 Date: 18 August 2005

Reviewer: Antonio Ascari-Raccagni

Reviewer’s report:

General

---------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

---------------------------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

---------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore):
In my opinion the technique of the insertion of a 10 ml syringe between the withdrawn plunge and the 50 ml syringe base isn’t of great interest.

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
