Reviewer’s report

Title: Pre-Hospital Treatment of Acute Poisonings in Oslo

Version: 2 Date: 22 August 2008

Reviewer: Nick Buckley

Reviewer’s report:

A few minor points only:

“the logistic regression analyses showed that gender did not predict discharge versus transferral”
- Gender did predict discharge vs transferral but this was not an independent predictor after adjustment for agent ingested – some slight rewording needed.

Figure 2 – many of the opioid overdose would also be “illicit drugs” – ? Other illicit drugs?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
