Reviewer's report

Title: The Association of Psychiatric Comorbidity and Use of the Emergency Department among Persons with Substance Use Disorders: An Observational Cohort Study

Version: 2 Date: 23 October 2008

Reviewer: Ian Rockett

Reviewer's report:

The authors have been very conscientious in responding to my initial questions and concerns. They have addressed those that they could with their available data. I believed that the paper was strong on my first reading, and that it is even stronger now. If published, it will be an important contribution in the area of emergency medicine and substance use/abuse treatment.

I now favor publication without further revision.
