Reviewer's report

**Title:** The Manchester Colour Wheel: Development of a novel way of identifying colour choice and its validation in healthy, anxious and depressed individuals

**Version:** 2  **Date:** 11 September 2009

**Reviewer:** David Simmons

**Reviewer's report:**

I have read the revised manuscript and I feel that it is now much improved, and, together with the response to referees, has adequately addressed all points made by the reviewers. Aside from still being slightly bemused by the permutation analysis (which is, nonetheless, now explained in more detail) I think this paper should now be published.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
