Reviewer's report

Title: Building capacity for evidence generation, synthesis and implementation to improve the care of mothers and babies in South East Asia: methods and design of the SEA-ORCHID Project using a logical framework approach

Version: 2 Date: 21 June 2010

Reviewer: Luis Gabriel Cuervo

Reviewer's report:

I have read the revised version and the response letter from the authors. The article reads better and I reckon it can be published as it is. The authors have explained with clarity what the study offers and its limits, including its focus on health care/services determinants. I commend the authors for their work in health systems research and I look forward to the publication of the results of this interesting study.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
