Reviewer's report

Title: Re-evaluating a vision-related quality of life questionnaire with item response theory (IRT) and differential item functioning (DIF) analyses

Version: 3 Date: 9 August 2011

Reviewer: Alan Tennant

Reviewer's report:

The authors have improved the explanation of their basic approach and this is now a good example of an IRT analysis.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
