Reviewer’s report

Title: Prediction of Intracranial Findings on CT-scans by Alternative Modelling Techniques

Version: 1 Date: 18 May 2011

Reviewer: Ivan Ng

Reviewer’s report:

The authors are to be congratulated for an excellent study using alternative modelling methods in prediction of outcome with minor tbi with regards to a positive ct scan finding. perhaps from a practical standpoint, the authors could discuss the significant salient features of the study and its impact on ascertaining variables of critical import which may be of value in streamlining current existing guidelines

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
