Title: Current Problems with Large-scale Clinical Trials Examining Cardiovascular Diseases in Japan: Evidence from a Questionnaire Survey

Version: 1 Date: 1 February 2011

Reviewer: Liu Xuemei

Reviewer's report:

This topic is interesting. The objective of this research is to investigate the funding and infrastructure of clinical trials. The research was conducted sound and conclusion is valuable. Only minor revision was needed for publication.

1. In the abstract, more details on quality control, investigated population etc should be described.

2. In the fulltext, more details of the characteristic of the investigated participants such as location, year etc should be reported.

3. Limitation of this study should be reported.
