Title: Mobile phones are a viable option for surveying young women: a comparison of two telephone survey methods

Version: 1 Date: 6 October 2011

Reviewer: Lawrence Barker

Reviewer's report:

Major compulsory revisions: none

Minor essential revisions: (1) Change the title and conclusions to indicate that these results apply to Australia. They might or might not apply to other countries. (2) Change 'there were no differences' to 'there were no significant differences'. (Abstract) (3) The authors should make clear in their limitations section that these results are for young women only, and might not apply to other demographics.

Discretionary revisions: None

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
