Reviewer's report

Title: Imputation strategies for missing binary outcomes in cluster randomized trials

Version: 2 Date: 8 January 2011

Reviewer: Alexis Turgeon

Reviewer's report:

The authors have adequately addressed the major comments of the first review. My only discretionary comment would be to shorten the manuscript, mainly the introduction section, to improve comprehension and readiness.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
