Reviewer's report

Title: What does a modified-Fibonacci dose-escalation actually correspond to?

Version: 3 Date: 9 May 2012

Reviewer: William Mietlowski

Reviewer's report:

Major compulsory revision: There is still one major error in Table 2. For dose level 7, the max actual dose is 40.00 but the mean actual dose is 67.96. This must be corrected.

Minor essential revisions: p.6 Typo "ermeging" instead of emerging.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
