Reviewer's report

Title: Validity of information on atopic disease and other illness in young children reported by parents in a prospective birth cohort study

Version: 2 Date: 26 August 2012

Reviewer: Carel Thijs

Reviewer's report:

Dear editor and authors,

The manuscript has much improved in clarity, and I am fully satisfied with the changes and responses to my comments, with one exception:

I am still missing wheeze in the table and Results section. I accept the explanation the authors give in the response letter (Rev1, point 4 "In fact there were no wheezy episodes registered ..."), but I would strongly suggest that this explanation is included in the Results section.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
