Reviewer's report

Title: Parental compliance-an emerging problem in Liverpool Community Child Health Surveys 1991-2006

Version: 2 Date: 16 March 2012

Reviewer: Arpana Verma

Reviewer's report:

Many thanks for the considerable time and effort spent on answering the comments and revision of the manuscript. I have found this incredibly difficult to rereview because of the limitations you have from using this kind of data and your ethical approval restrictions.

However, I feel that some of the points raised by both reviewers concerning the analyses performed are still not addressed and would strongly recommend that a statistician is consulted.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
