Reviewer’s report

Title: Improvement of maternal Aboriginality in NSW birth data

Version: 1 Date: 10 August 2011

Reviewer: Brenda Elias

Reviewer’s report:

This paper makes a very important contribution to the literature and will be widely cited. The compulsory revisions requested are more style related and strengthen the paper for a broader audience, including up and coming scholars such as students. While I checked unable to decide, I strongly recommend that this article be published with the revisions requested, as the revisions are only style related. These revisions could be achieved under the direction of the editor and will not require an additional peer review.

Level of interest: An exceptional article

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:

I declare that I have no competing interests.
