Title: Using the Framework Method for the analysis of qualitative data in multi-disciplinary health research

Version: 2 Date: 28 August 2013

Reviewer: Gavin Daker-White

Reviewer's report:

The manuscript represents a substantial improvement on the previous version and I am happy to recommend acceptance. I particularly note the large number of references that have been brought in and the way that the method is now better 'located' in relation to other qualitative methods. I have two very minor recommendations for improvement, detailed below.

Minor, discretionary changes

1. Abstract: change "medical and health research" to "health and illness research."

2. Background, 1st para., 9th line: replace "unique" with "defining" or similar.
