Reviewer’s report

Title: Using the random forest method to detect a response shift in the quality of life of multiple sclerosis patients: a cohort study

Version: 3 Date: 1 February 2013

Reviewer: Hiromi KIKUCHI

Reviewer’s report:

I suggested two major revisions and one minor revision. The all points that I suggested were considered well in the paper. I expect that you develop the results of this study for an intervention study.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
