Reviewer's report

Title: Confidence Regions for Repeated Measures ANOVA Power Curves Based on Estimated Covariance

Version: 2 Date: 27 February 2013

Reviewer: Warren Comulada

Reviewer's report:

The authors have adequately addressed all of my concerns. In particular, they elaborated on examples where the design matrix $X$ has a rank of one. They also added my suggested reference (Kraemer et al. 2006) to the introduction.

I also note that the authors have addressed comments from other reviewers, e.g. explaining how results would be extended beyond omnibus F test.

I proposed that the article now be accepted for publication.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
