Reviewer's report

Title: OvidSP Medline-to-PubMed search filter translation: a methodology for extending search filter range to include PubMed's unique content

Version: 2 Date: 4 May 2013

Reviewer: Julie Glanville

Reviewer's report:

I appreciate the efforts of the authors to revise the paper in the light of referees' comments. I feel that the paper is now clearer in the presentation of the rationale for the research, and the value of the extension to the filter is realistically presented. I think that the limitations of the study are well expressed and the options for future work well presented.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I am an author of search filters and lecture on search filter design.
