Reviewer's report

**Title:** A randomized controlled trial of the effectiveness of a pre-recruitment primer letter to increase participation in a study of colorectal screening and surveillance.

**Version:** 2  **Date:** 19 February 2014

**Reviewer:** Lambert Felix

**Reviewer's report:**

Thank you for resubmitting the manuscript explicitly addressing most of the comments. The revised manuscript reads very well.

**Discretionary Revisions**

I have one final comment with regard to the randomisation procedure. I think it would be really useful if the authors explicitly mention that they used 'Computer generated random sequence' to randomly allocate the participants.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.

**Declaration of competing interests:**

I declare that I have no competing interests
