Reviewer’s report

Title: Assessment of medicines utilisation in neonates: comparison of a unit level medicines usage survey and individual level point prevalence survey

Version: 1 Date: 17 February 2014

Reviewer: Krista Fischer

Reviewer’s report:

1. Major Compulsory revisions: in my attached report I list some paragraphs, that are not clearly written. There are problems with presenting and interpreting numerical data. These should be addressed by the authors.

2. Minor essential revisions. There are some places in the text where the wording is not correct for a scientific publication (e.g. "good correlation"). Please see my attached report for details.

3. Discretionary revisions. Some aspect that may be useful to comment, e.g. cost issues of the two designs.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
