Reviewer’s report

Title: Standardisation of information submitted to an endpoint committee for cause of death assignment in a cancer screening trial - lessons learnt from CAP (Cluster randomised trial of PSA testing for Prostate cancer)

Version: 1 Date: 15 November 2014

Reviewer: Isabelle Boutron

Reviewer’s report:

The manuscript is well written and improved.
The interpretation of the results from phase 1 and phase 2 are still difficult. The main results is that the percentage of reviewers that were unable to answer was higher. This is the results that should be highlighted the most.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
