Reviewer's report

Title: A framework for power analysis using a structural equation modelling procedure

Version: 5  Date: 23 October 2003

Reviewer: Fruhling Vesta V Rijsdijk

Reviewer's report:

General
I'm happy with the revised manuscript and the way all additional comments were addressed. Please accept my apology for claiming that required SS for 80% Power in Table 8 should be 27. It should indeed be 28.

Discretionary Revisions (which the author can choose to ignore)
In the additional files, the scripts for example 2 still give the incorrect input correlation matrix.

Minor Compulsory Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
None

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None

What next?: Accept without revision

Level of interest: An article of importance in its specialized field or of broad interest

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
