Reviewer’s report

Title: No role for quality scores in systematic reviews of diagnostic accuracy studies

Version: 2 Date: 6 May 2005

Reviewer: George Swingler

Reviewer’s report:

General

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

None

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

None

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

Authors’ response adequate

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
