Title: Optimizing Search Strategies to Identify Randomized Controlled Trials in Medline

Version: 3 Date: 24 December 2005

Reviewer: R Brian Haynes

Reviewer's report:

General

The authors have been responsive to each of my second round review comments. I don't feel that any other revisions are needed.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
