Reviewer's report

Title: Conducting a critical interpretive review of the literature on access to healthcare by vulnerable groups

Version: 1 Date: 28 April 2006

Reviewer: Myfanwy Lloyd Jones

Reviewer's report:

General
This is an interesting and important article introducing a novel methodological approach which is likely to stimulate wider debate.

---------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

---------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
A few of the references (eg 36, 37, 43) need attention, presumably because of Reference Manager's well-known tendency to mangle references other than journal articles.

---------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

---------------------------------------------------------------------------------------------------------------------

What next?: Accept after minor essential revisions

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No
