Reviewer’s report

Title: Relation between body mass index and depression: A structural equation modeling approach

Version: 4 Date: 20 April 2007

Reviewer: Fiona Shrive

Reviewer’s report:

General
The authors have done a tremendous revision and the manuscript is much improved as a result. The objective is clearly stated with analysis plan, methods and conclusions clear support the objective throughout the paper.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
