Reviewer's report

Title: A predictive Bayesian approach to risk analysis in health care

Version: 1 Date: 11 April 2007

Reviewer: Freedom Nkhululeko N Gumedze

Reviewer's report:

General
The article is well written; I searched and could not find any typographical errors.

The rationale and statistical methods for the reported study have described succinctly.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
It would be useful to include a real data example of the proposed approach and comparisons made with available Bayesian risk analysis methods.

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)
