Reviewer’s report

Title: A markov model to evaluate hospital readmission

Version: 1 Date: 22 March 2008

Reviewer: Nikos Maniadakis

Reviewer’s report:

This is a well written and highly technical paper which is dealing with the use of statistical modelling to predict readmission to hospital. It is a interesting work that is worth publishing and is useful as it can be applied to other settings and diseases whenever data are available

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
