Reviewer's report

Title: Building blocks for meta-synthesis: data integration tables for summarising, mapping, and synthesising evidence on interventions for communicating with health consumers

Version: 2 Date: 11 February 2009

Reviewer: Atle Fretheim

Reviewer's report:

Editor,

The authors have conducted a through review of their paper which addresses all the critical points I raised in my previous review. I support the decision to classify the paper as a "Correspondence"-piece.

I congratulate the authors for their effort.

My judgment is that the paper is ready for publication as is.

Yours,

Atle Fretheim

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
