Reviewer's report

Title: "I should live and finish it": A qualitative inquiry into Turkish women's menopause experience

Version: 2 Date: 12 October 2008

Reviewer: Philip Hannaford

Reviewer's report:

The authors have taken on board previous comments regarding how the sample was obtained, and the methodological approach and analysis used. The results are likely to be of interest to readers other than just in Turkey. I now recommend publication, although someone does need to review the paper for typographical and grammatical errors.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
