Reviewer's report

Title: Detecting depressive and anxiety disorders in distressed patients in primary care; comparative diagnostic accuracy of the Four-Dimensional Symptom Questionnaire (4DSQ) and the Hospital Anxiety and Depression Scale (HADS)

Version: 2 Date: 16 July 2009

Reviewer: Adomas Bunevicius

Reviewer's report:

Authors have addressed all comments and improved the manuscript significantly. Therefore I think that the paper is suitable for publication at the BMC Family Practice.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
