Reviewer's report

Title: Primary Paediatric Care models and non-urgent Emergency Department utilization: An area-based cohort study

Version: 1 Date: 11 February 2010

Reviewer: lee A wallis

Reviewer's report:

Lee Wallis
thanks, i enjoyed this:

comments

Major:
aim of the study is really not clearly spelled out; needs revision

Minor:
English is not great throughout
table 1 adds no value; suggest removal
table 2 is very heavy going
tables 4 & 5 need to be easier to read
results are hard to read through
conclusion seems loose - i would like to see a firmer recommendation here

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
