Reviewer's report

Title: Factors associated with patients self-reported adherence to prescribed physical activity in routine primary health care

Version: 3 Date: 4 May 2010

Reviewer: Sally Rose

Reviewer's report:

In general, the authors have adequately addressed the outstanding concerns I had and made corresponding revisions to their manuscript, thank you.

Discretionary revision
The authors comment on the inclusion of the Swedish Reference 8, noting:
"We are grateful for this comment and apologize for missing that Ref 8 was the only one in the Method section. We have now removed the statement and the reference in that section."

The reference is still mentioned in the method section, so does not appear to have been removed as stated, if the authors intend to remove it - please do so.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
