Reviewer's report

Title: Are GPs adequately equipped with the knowledge for educating and counseling of families with ADHD children?

Version: 2 Date: 2 December 2009

Reviewer: Yoram Nevo

Reviewer's report:

This is an improved version of the manuscript. The sentence "Just 20% agreed that ADHD is not a serious problem" is misleading and should be deleted from the results of the abstract.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
