Title: Priority Setting in Primary Health Care - Dilemmas and Opportunities: A Focus Group Study

Version: 2 Date: 18 June 2010

Reviewer: Anne Slowther

Reviewer’s report:

Having reviewed this paper and the author’s responses to initial reviews I do not think any major revisions are now needed.

I note that there are still instances of interview and focus group being used interchangeable notable in the analysis section of the Method. This should be addressed.

Level of interest: An article of importance in its field

Quality of written English: Acceptable
