Reviewer’s report

Title: Patient safety culture measurement in general practice. Clinimetric properties of SCOPE

Version: 2 Date: 23 September 2011

Reviewer: Panayota Sourtzi

Reviewer’s report:

The authors have revised their article according to the reviewers comments and I am generally satisfied with them. Some minor corrections, as well as careful reading, will make the article read easier.

minor essential revisions

page 3, the phrase you added in the 4th paragraph "As at the tim..." does not read correctly, please read and correct.

page 5, 5th line of 2nd paragraph, change "obliged" to "obligatory"

Finally consider noting what medical assistant's role is in Dutch general practices, as this profession does not exist everywhere.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
