Reviewer’s report

Title: Treatment of depressive disorders in primary care - protocol of a multiple treatment systematic review of randomized controlled trials

Version: 2 Date: 6 November 2011

Reviewer: Cindy L Lam

Reviewer’s report:

The revised protocol has addressed all the issues that I have raised with the initial submission. The investigators have presented a very thoughtful protocol to addresses the very important research question on the effectiveness of different treatments of depression in primary care. I look forward to reading about the results of their study.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
