Reviewer's report

**Title:** How do family physicians communicate about cardiovascular risk? Frequencies and determinants of different communication formats

**Version:** 3 **Date:** 18 February 2011

**Reviewer:** Tim Holt

**Reviewer's report:**

I am happy with the corrections that have been made.
There are a few minor grammatical errors which should be corrected prior to publication. Eg:
Page 6 'which no one of the GPs finally did' should be 'which none of the GPs finally did'
Page 10 'patientes' should be 'patients'
Page 10 'All other potential covariates analyzed did not show any association with the communication format' might be 'None of the other potential covariates analyzed showed any association with the communication format'

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
