Reviewer's report

Title: Managing depression in primary care: A meta-synthesis of qualitative and quantitative research to identify barriers and facilitators.

Version: 2 Date: 20 April 2011

Reviewer: David Pilgrim

Reviewer's report:

I have read this alongside my previous feedback and the comments from the other reviewer. Both of us were essentially happy and made suggestions about the wording and scope of the review. I think that the authors have now addressed these comments appropriately and would be happy to see the article published.
