Reviewer's report

Title: A multicentre, randomised, double-blind, single-dose study assessing the efficacy of AMC/DCBA Warm lozenge or AMC/DCBA Cool lozenge in the relief of acute sore throat

Version: 3 Date: 22 December 2010

Reviewer: Ronald Eccles

Reviewer's report:

The manuscript is now satisfactory apart from one minor essential revision- the authors should amend the labelling of the figures to fit in with the changes in the text and non-medicated lozenge should be labelled as unflavoured non-medicated lozenge

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
