Reviewer’s report

Title: Cardiovascular screening in general practice in a low SES area.

Version: 2 Date: 6 July 2012

Reviewer: Christoph Heintze

Reviewer’s report:

Dear Mss Bobier

Sorry for my late response concerning the invitation to complete this review. My teaching activities at the medical school are time consuming.

The subject of this article is of interest and of importance. However, I see only limited benefit for improvements for cardiovascular screening in primary care based on the results of the presented manuscript.

The information given in the background and the results are sometimes confusing without addressing a clear research question and answer. The selection of respondents in the article is not clearly described in the methods.

I would be glad to be informed about the results of the review process.

With best regards,

Christoph Heintze

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.

With regards

Christoph Heintze
