Reviewer's report

Title: Coding of procedures documented by general practitioners in Swedish primary care - an explorative study using two procedure coding systems

Version: 2 Date: 2 December 2011

Reviewer: Zoe Morrison

Reviewer's report:

Many thanks to the author's of this paper for their diligence in attending to Reviewers' comments. I enjoyed reading this amended version very much.

Discretionary revisions

I was pleased to see that the authors have tried to address the international dimensions of this debate as suggested. However, only mentioning the UK's endorsement of SNOMED comes across as a little limits and it would have been interesting to have a sentence or two more on this for clarity/ expansion on the importance of this.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I have no competing interests.
